Thousandths

You can write $\frac{734}{1,000}$ in a place value chart. Be sure that the last digit, 4, is in the thousandths place.

ones		tenths	hundredths	thousandths
0	.	7	3	4

Read the part of the number to the right of the decimal place. Then say the name of the final place.

You should read "seven hundred thirty-four thousandths."
That is also how you would read the fraction $\frac{734}{1,000}$.

Write each as a decimal.

1. $\frac{132}{1,000}$

2. $\frac{892}{1,000}$

3. $\frac{4}{1,000}$

4. $\frac{63}{1,000}$

_____   _____   _____   _____

5. 902 thousandths

6. 2 thousandths

_____   _____

Write each in word form.

7. $\frac{5}{1,000}$

8. $\frac{82}{1,000}$

_____   _____

9. $\frac{923}{1,000}$

10. $\frac{73}{1,000}$

_____   _____

_____   _____

11. 0.305

12. 0.006

_____   _____

13. 0.015

14. 0.598

_____   _____

Use with text pages 544–545.
